

# LTE Modem Firmware Update Guide

## 4G-AC55U

Dual-Band Wireless-AC1200 LTE Modem Router

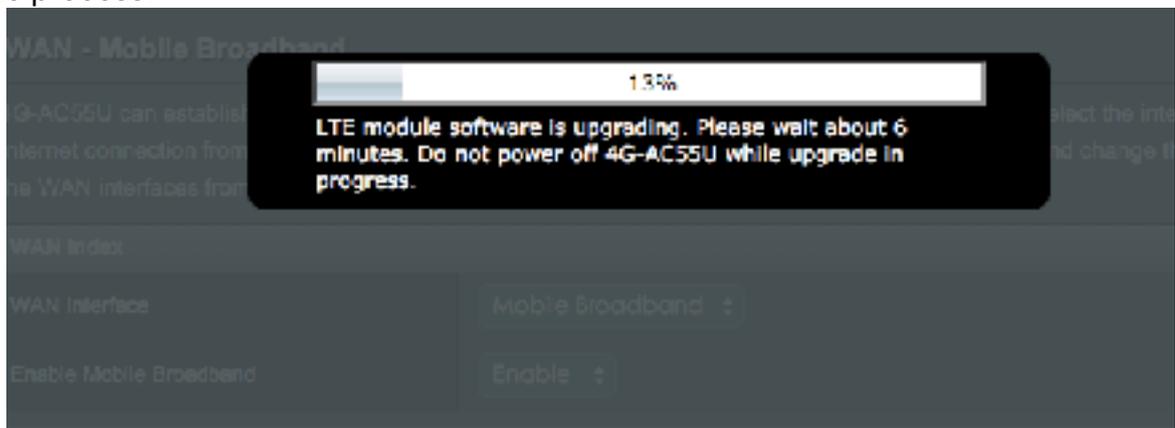

1. After uncompress the LTE modem firmware package, there are 3 files in the uncompressed folder.

2. Copy these 3 files onto the USB drive in the following path “/4G-AC55U\_LTE”.
3. Insert the USB drive to the USB port of 4G\_AC55U, then open the administration webpage. Once the USB drive has been recognized, go to **WAN > Internet Connection** and select Mobile Broadband on "WAN Interface" item, you will see "New software version" shows up.

4. **Before performing the firmware update, please make sure the SIM card has been removed.** After SIM card is removed, then click **Update** button to start LTE modem update process.

5. Once the update process is done, the modem software version name will change accordingly.
